

2025 Design Registration Fee Consultation

Hello,

We would like to invite you to participate in our design registration fee consultation. We are proposing fee changes for gas (GA), elevating devices (ED), and boilers, pressure vessels and refrigeration (BPVR) design registration applications for 2025.

Our proposed fees contribute to supporting investments in new technology to improve speed of service, application workflow, and client support. You can view the full list of enhancements to design registration on our consultation [Engage page](#).

Consultation is open from May 8 – June 14. Your input will help us to understand the impacts of the fee changes to you and your industry and the improvements that you would like to see in the design registration process.

How Design Registration Fees Are Used

Design registration fees are set to recover costs related to product innovation and service improvements to better support our safety partners and clients.

If you have any questions about the consultation, please contact our [marketing insights and engagement team](#).

Thank you for your commitment to building a safer BC.
